

## Exciting opportunities for Graduate and Post Graduate Students to work with internationally renowned experts in the field of Autism.

The **Autism Centre for Excellence (ACE)** is being setup by **The Special Child Trust (TSCT)** in collaboration with **The New England Center for Children (NECC)**, a Boston based institution with over 40 years of experience in the field of Autism. NECC has a comprehensive body of research including proven teaching procedures and practices that will be utilized for our school.

The school will be set up on the Heritage school campus with a vision to provide individualized, science based educational services to children on the autism spectrum who have not been able to integrate into mainstream schools. In addition, ACE will also have a graduate- level program based on the principles of Applied Behavior Analysis (ABA) in collaboration with NECC where the graduate students would work towards a Master's degree based on credits from course work as well as on site work experience.

ACE will cater to moderate to severe children of all functionalities on the Autism Spectrum and is expected to start by January, 2014.

## Learn Today, on behalf of (TSCT), is inviting applications for Speech and Language Therapist at the Autism Centre For Excellence (ACE)
